

# MLFQ project

Ahmad emrani

در این پروژه یک MLFQ پیاده‌سازی شده است که در اینجا نحوه کار با آن و نمونه خروجی آن در صفحه بعد گذاشته شده است.

ابتدا باید تعداد صف‌ها و نوع آنها را مشخص کنیم.

- RR
- FCFS
- LCFS
- PRIORITY
- Short Job First
- Last Job First

در ادامه نیز تعداد پروسه‌ها را وارد می‌کنیم و زمان درخواست و مدت‌زمان سرویس را مشخص می‌کنیم.

- Arrival Time
- Service Time

و در انتها ما یک جدول و یک خط زمانی داریم. محتوای جدول:

- زمان درخواست AT
- مدت‌زمان سرویس ST
- زمان پاسخگویی RT
- مدت‌زمان بازگشت TAT
- مدت‌زمان انتظار WT
- زمان اتمام پروسه CT

همچنین اگر از صف اولویت استفاده کنیم در جدول اولویت هر پروسه را نمایش می‌دهد.

```
PS E:\resume project\MLFQ> python mainprogram2.py
Enter the number of queues: 2
Queue 1:
Enter scheduling algorithm (RR, FCFS, LCFS, Priority, SJF, LJF): Priority
Queue 2:
Enter scheduling algorithm (RR, FCFS, LCFS, Priority, SJF, LJF): SJF
Enter the number of processes: 3
Enter arrival time of process P1: 0
Enter service time of process P1: 10
Enter priority of process P1 (lower is higher priority): 1
Enter arrival time of process P2: 0
Enter service time of process P2: 30
Enter priority of process P2 (lower is higher priority): 10
Enter arrival time of process P3: 0
Enter service time of process P3: 20
Enter priority of process P3 (lower is higher priority): 5
```

#### Process Details:

PID	AT	ST	RT	TAT	WT	CT	Priority
P1	0	10	0	10	0	10	1
P2	0	30	30	60	30	60	10
P3	0	20	10	30	10	30	5

#### Gantt Chart:

| P1 | P3 | P2 |

```
PS E:\resume project\MLFQ> 
```

```
PS E:\resume project\MLFQ> python mainprogram2.py
```

```
Enter the number of queues: 3
```

```
Queue 1:
```

```
Enter scheduling algorithm (RR, FCFS, LCFS, Priority, SJF, LJF): RR
```

```
Enter quantum time: 5
```

```
Queue 2:
```

```
Enter scheduling algorithm (RR, FCFS, LCFS, Priority, SJF, LJF): RR
```

```
Enter quantum time: 10
```

```
Queue 3:
```

```
Enter scheduling algorithm (RR, FCFS, LCFS, Priority, SJF, LJF): FCFS
```

```
Enter the number of processes: 3
```

```
Enter arrival time of process P1: 0
```

```
Enter service time of process P1: 5
```

```
Enter arrival time of process P2: 0
```

```
Enter service time of process P2: 20
```

```
Enter arrival time of process P3: 0
```

```
Enter service time of process P3: 15
```

```
Process Details:
```

PID	AT	ST	RT	TAT	WT	CT	Priority
P1	0	5	0	5	0	5	N/A
P2	0	20	5	40	20	40	N/A
P3	0	15	10	35	20	35	N/A

```
Gantt Chart:
```

```
| P1 | P2 | P3 | P2 | P3 | P2 | P3 | P2 |
